

JSCA delivers the most comprehensive and accurate information available on global medical publishing and conference communications opportunities.

Invaluable tools to increase the speed and accuracy of your research, Journal Selector profiles every leading peer-reviewed biomedical journal in the industry, and Conference Authority helps you identify the optimal conference or similar venue to present your research findings. Conference Authority contains the most comprehensive, accurate and frequently updated information on global conferences available in the industry.

Journal Selector features:

Topic search functionality that shows all the journals that have been indexed under a specific term (unlike competing applications)

80+ indexed fields including information in the Clinical Trials Registry

Publishing opportunities in new venues including e-publishing, Open Access journals, and practice-oriented journals

Submission deadlines for conference presentations are integrated with PUBSTRAT's publication workflow

Conference Authority features:

Extensive conference profiles indexed by dozens of fields and containing up to 50 unique data elements

Searchable content by keyword

Customized e-mail alerts on impending abstract deadlines or revised submission deadlines

Submission deadlines for conference presentations are integrated with PUBSTRAT's publication workflow
